

Define your problem statement

- As trains are most preferred modes of transportation of people, The main problem to face, how to booking train immediately for their purpose.
- The elder people did not go to book a train ticket on ticket counter not easy
- Simultaneously there are facing a problems while travelling like fire accident, chain- snatching. To avoid all such brutality we came up with a solution by providing an application. With a single click this app addresses issues by sending text message to TC and RPF as an alert

Brainstorm

- creating an Application for passengers
- Digital Railway Solution
- Digital Twin— Digital platform for railways and airways.
- Role of sensors in predictive maintenance.
- Predictive maintenance and CMMS.
- The IoT-connected trains.
- Big Data analytics for smart railways.
- Safety is a key area of concentration

Group ideas

To protect from:

- *Fire accident*
- *Theft*
- *Robbery*

Include features like:

- *QR CODE*
- *TRACKING*
- *CCTV*
